

Crop Report - week: 45-2011

Company: **Onings**
Crop: Field bulbs (2 year bulbs, scales and 1 year bulb)
Crop year: 2012
Site: Valdivia
Operation Manager: Alex Aylwin Sch.

General comments

2 year growing bulbs (second season)

The crop is growing healthy and in about 10 days more will be ready for debudding. The colors are showing the rational applying of fertilizers in combination with the good weather conditions the last 2 weeks. The spraying, fertilization and irrigation goes under the program.

2 year growing bulbs (first season)

At this moment the first plants are emerging and in general are looking good. The spraying, fertilization and irrigation goes under the program.

Scales

As you could see in attached pictures the emergency is normal for this stage and plants are looking good. The spraying, fertilization and irrigation goes under the program.

1 year bulbs

The bulbs are planted since end of September and as you can appreciate in attached pictures the colors and the plants themselves are looking strong.

The spraying, fertilization and irrigation goes under the program.
